NEW
WORK**

Our application works on desktop, tablet and smartphones. So you have the possibility to book your place at any time and any place.

Floor plans of your company are displayed as graphical interfaces in the system.

Project work at the customer, mobile working and field service mean that workplaces in your office are often unoccupied?

// Book anytime and anywhere from any device

Via a server in the cloud, it is possible for us to offer the application as SaaS - Software as a Service. You are spared acquisition and operating costs. Our hosting service provider operates its data centers exclusively in Germany and uses 100% green electricity.

// Clear design of the floor plan

The digitized floor plan shows which desks are occupied and when. The desk sharing software shows employees which desks in the office are free and which are already occupied. This makes it easy for employees to find out which of their colleagues is in the office.

// Optimizing capacity utilization through reservable workstations

DEIN RAUM helps you to realize the introduction of future-oriented desk-sharing concepts and thus to use resources optimally and efficiently.
